*"Finalist of " Entrepreneur of the year" Kingston Business Awards 2011" Kingston Business Awards 2011"*

Advanced Professional Plumbing & Heating Services have extensive experience in the commissioning and decommissioning of commercial gas pipework and the associated pipework purging services required. We have an enviable record of completed commercial gas projects large and small, and we can carry out comprehensive gas testing and purging of commercial gas pipework throughout London and surrounding areas. We have Gas Engineers trained to deal with all aspects of commercial gas pipework purging whether on new build, refurbishment or decommissioning.

In IGE/UP/1 and IGE/UP/1A (Strength Testing, Tightness Testing and Direct Purging of Industrial and Commercial Gas Installations), The Institution of Gas Engineers and Managers (IGEM) has laid out clear principles which must be observed whenever a gas supply is to be commissioned or decommissioned, whether a new or an existing installation is involved. The person making the supply available must ensure that all air and gas, other than the gas to be supplied, is purged from the installation.

## **Commercial Gas Pipe Tightness Testing**

Tightness testing is carried out to ensure that your gas pipework is safe for use. In a new gas pipework installation the test is to verify that pipework is gas tight.

On existing gas pipework installations, the test is to confirm that the pipework is gas tight.

A smell of gas or presence of gas detected would fail the test and would be required to be traced and repaired which ABC can also attend to.

We recommend that all gas pipework be tested on an annual basis. This can be carried out at the same time as the annual gas appliance service visit.

We also undertake all other gas services including new installations of central heating systems, planned preventative maintenance and also repairs of boilers, both domestic and commercial.

### **Commercial Gas Pipe Purging Service Engineers - Why is a purge required?**

Whenever gas pipework is repaired, extended or newly installed a purge must be conducted.

### **Which purging services do we provide?**

We are experts in the commissioning and decommissioning of commercial gas pipework.

Advanced Profesional Plumbing & Heating have a large project portfolio for commercial gas pipework low pressure purging on both large and small systems. We provide purging services for both new build, recommissioning or decommissioning projects.

Gas purging services are offered throughout all London Areas and surrounding areas.

### **Recommended Gas Safe (Corgi) Engineers for Commercial Pipe Purging**

We have experienced, highly trained engineers to undertake purging correctly as set out by The Institue of Gas Engineers and Managers (IGEM) for both documents IGE/UP/1 and IGE/UP/1A (Strength testing, tightness testing and direct purging of industrial and commercial gas installations).

## **We can assist all Domestic & Commercial Customers**
